

M12-Mounting clip with clamping foot for C-rails

PRODUCT DESCRIPTION

The Mounting clip for C11-rails with material thickness of 1.5 mm serves as an installation help for the secure fixing of M12 connectors. The clamping foot can be assembled by a 90° turn into the rabbet of C11-rails, afterwards the M12 connector is simply pressed in from above.

ADVANTAGES

- > easy handling
- > good holding force
- > universally applicable
- > simple mounting without tools into C11-rails
- > high stability

TECHNICAL DATA

Material: self-extinguishing according to UL94-V0
