## VERSCHRAUBUNGSMONTAGE

Einfach aufstecken
Just press in

Ohne Werkzeug schnell demontiert
Quick dismounting without tools

Bund der Rasthülse an den Grundkörper andrücken und abziehen

## SCHUTZART

Zum Erreichen der Schutzarten IP 68 | 67 | 66 | 65 nach EN 60529/ IEC 60529 und IP 69K* nach DIN 40050 T. 9 bitte folgendes beachten: Schutzschlauchtrennung: Wellschlauch ROHRflex ${ }^{\circledR}$ im Wellental trennen. Bitte darauf achten, dass eine Unplanheit von maximal einem Wellengang nicht überschritten wird.

## MONTAGE

Die Verschraubung mit Schlauchanschlussaufnahme auf die getrennte Schlauchseite montieren. Die Verschraubung auf den Wellschlauch schieben, bis dieser nicht weiter einrastet und die Verschraubung nur noch mit Kraftaufwand zu drehen ist. Der entlastete Wellschlauch drückt die Krallen der Rasthülse in die Wellschlauchtäler. Hierdurch wird die Verschraubung einwandfrei verriegelt.

FLEXAquick ${ }^{\circledR}$ Verschraubung mit einer Demontagesperre.

Ein 0-Ring wird über die Verschraubung gezogen und in die Spalte zwischen Verschraubungsgehäuse und Rasthülse gedrückt. Hierdurch wird die Verschraubung einwandfrei verriegelt. Die Verschraubung kann nun nicht mehr ohne Werkzeug demontiert werden.

## DEMONTAGE

Die Demontage des Wellschlauches erfolgt durch Andrücken des Bundes der Rasthülse an den Verschraubungskörper, danach den Schlauch aus der Verschraubung, oder die Verschraubung vom Wellschlauch ziehen.

Die Verschraubung ist wieder einsatzbereit

## PROTECTIVE SYSTEM

Please note the following in order to attain protective System IP 68 | 67 | 66 | 65 acc. to EN 60529/IEC 60529 and IP 69K* according to DIN 40050 T.9:
Parting of protective tubing: Cut the ROHRflex ${ }^{\circledR}$ tubing between two ribs. More than one rib should not be passed while cutting the tubing.

## ASSEMBLY

Tubing and connector must be assembled to the cut tubing side. Push the connector on to the tubing until it can not snap-in any more and the connector can only be turned with force. The relieved corrugated tubing pushes the claws of the snap-insleeve between the ribs, this means an exact closing of the connection.

FLEXAquick ${ }^{\circledR}$ connector with locking device.

Pull 0-ring over connector housing and between connector housing and snap-in-sleeve, which means a perfect lock. Now dismounting without tools is not possible.

## DISMOUNTING

Press the ring of the snap-in-sleeve to the connector case, then pull the tubing out or the connector from the tubing.

The connector is ready for use again.

## Press ring on the housing

 and pull off
